TENTANG SUNBLIX

Powering a Brighter Future

SUNBLIX menghadirkan solusi energi surya terintegrasi untuk rumah, bisnis, dan kebutuhan energi yang lebih besar.

Kami merancang, membangun, dan menyediakan sistem PLTS yang disesuaikan dengan kebutuhan energi, kapasitas rooftop, dan karakteristik setiap lokasi.

CLEAN ENERGY
Energi bersih untuk masa depan yang lebih baik.

SUSTAINABLE
Solusi untuk penggunaan energi yang lebih berkelanjutan.

INNOVATIVE
Teknologi yang dirancang untuk kebutuhan nyata.

A BRIGHTER FUTURE
Energi untuk rumah, bisnis, dan komunitas.

A CLEANER PLANET

WHY GO WITH SUNBLIX?

More than solar panels.
A complete energy solution.

"Clean energy today, a brighter tomorrow for you and the next generation."

01 | SYSTEM DESIGNED FOR YOU

Setiap sistem disesuaikan dengan kebutuhan energi dan kondisi rooftop Anda.

02 | COMPLETE SOLAR SOLUTION

Solar panel, inverter, battery option, material, dan instalasi dalam satu solusi.

03 | PROFESSIONAL INSTALLATION

Sistem dirancang untuk dipasang secara rapi, aman, dan sesuai kondisi lokasi.

04 | FLEXIBLE ENERGY STORAGE

Tambahkan battery storage untuk kebutuhan energi yang lebih fleksibel.

05 | AFTER-SALES SUPPORT

Kami tetap mendampingi setelah sistem selesai dipasang.

We don't just install solar panels.
We build energy solutions around you.

RESIDENTIAL	COMMERCIAL	INDUSTRIAL	A GREENER INDONESIA
A more comfortable home	A more efficient business	A more productive future	For generations to come

HOW IT WORKS

From Sunlight to Your Home

Sistem PLTS mengubah energi matahari menjadi listrik yang dapat digunakan untuk kebutuhan sehari-hari, dengan opsi penyimpanan energi untuk fleksibilitas lebih besar.

1 Solar Panel
Mengubah energi matahari menjadi listrik DC.

2 Inverter
Mengelola dan mengonversi listrik DC menjadi listrik AC untuk digunakan di rumah.

3 Rumah Anda
Listrik digunakan untuk memenuhi kebutuhan sehari-hari.

PLN (Grid)

4 Battery (Optional)
Menyimpan energi untuk digunakan saat dibutuhkan, seperti malam hari atau saat listrik padam.

1 SOLAR PANEL
Menangkap energi matahari dan mengubahnya menjadi listrik DC.

2 INVERTER
Mengelola dan mengonversi listrik DC menjadi listrik AC.

3 HOME / BUSINESS
Listrik digunakan untuk peralatan dan kebutuhan sehari-hari.

4 BATTERY (OPTIONAL)
Menyimpan energi untuk fleksibilitas lebih besar.

A SMARTER WAY
TO A BRIGHTER TOMORROW

RESIDENTIAL
Rumah yang lebih nyaman

COMMERCIAL
Bisnis yang lebih efisien

INDUSTRIAL
Industri yang lebih berkelanjutan

STRONGER TOMORROW

STORE ENERGY. USE IT WHEN YOU NEED IT.

Battery storage gives you more freedom, more security, and a more reliable energy supply for your home.

Backup Power
Keep essential devices running during outages.

Use Energy Your Way
Store surplus solar energy and use it when needed.

Greater Independence
Reduce reliance on the grid.

A More Sustainable Home
Maximize clean energy usage and minimize waste.

DOES YOUR ROOFTOP HAVE ENOUGH SPACE?

Turn your rooftop into a clean energy source.

Check the required area for each system capacity and find the right fit for your property.

YOUR ROOFTOP → YOUR SOLAR POTENTIAL

PV Capacity	Area PV
2.34 kWp	13 m²
3.51 kWp	19 m²
4.68 kWp	26 m²
5.85 kWp	32 m²
7.02 kWp	39 m²
8.19 kWp	45 m²
9.36 kWp	52 m²
10.53 kWp	58 m²
11.70 kWp	64 m²
12.87 kWp	71 m²
14.04 kWp	77 m²
15.21 kWp	84 m²
16.38 kWp	90 m²

Area PV = area yang diperlukan untuk penempatan panel berdasarkan standard paket.
Final layout is subject to site survey.

THINGS TO CONSIDER

ROOFTOP AREA
Pastikan tersedia area yang cukup sesuai kapasitas sistem.

ROOF CONDITION
Jenis atap, kemiringan, dan struktur mempengaruhi desain instalasi.

SUN EXPOSURE
Area yang minim bayangan akan memberikan hasil yang lebih optimal.

LOCATION
Kami akan melakukan survey untuk memastikan desain terbaik untuk properti Anda.

A PROPER ROOFTOP TODAY FOR A BRIGHTER TOMORROW.

CLEANER ENERGY | LOWER ELECTRICITY COST | HIGHER PROPERTY VALUE | A GREENER INDONESIA

READY TO GO SUNBLIX?

4 simple steps to start your solar journey.

STEP 01 — TELL US ABOUT YOUR PROPERTY

Berikan informasi dasar mengenai properti Anda.

- **Jenis properti**
  Rumah, kantor, toko, pabrik, dll.
- **Kapasitas listrik**
  Daya terpasang (VA)
- **Luas rooftop**
  Estimasi luas area tersedia
- **Lokasi**
  Alamat lengkap

STEP 02 — WE CHECK YOUR ROOFTOP

Survey dan evaluasi area PV.

STEP 03 — WE DESIGN YOUR SYSTEM

Kapasitas PV + inverter + battery option.

STEP 04 — WE BUILD IT

Instalasi sampai commissioning.
